COMPLIANCE SERVICES FOR THE OIL & GAS INDUSTRY

Leggette, Brashears & Graham, Inc. (LBG) offers environmental permitting and compliance services to meet the regulatory needs of our oil and gas clients, at the local, state and federal levels. Whether the requirement involves the preparation of a plan, permit application /modification, sample collection or other compliance activity, LBG has relevant industry experience.

LBG has experience in the preparation of compliance plans for both construction projects and existing production assets. In addition to preparing spill prevention, storm-water and wetlands mitigation plans, we can assist our clients with the design and construction of upgrade to bring production facilities back into compliance.

LBG can assist clients in obtaining and modifying water and air discharge permits. On request, LBG will manage the logistics of the entire permit compliance process, including communication and scheduling, as well as implementing the required sampling and reporting scope of work.

SERVICES PROVIDED BY LBG CAN BE GENERALLY CATEGORIZED AS:

- Spill Prevention Control and Countermeasures (SPCC) Plan
- Sara Title III Reporting
- Contingency Plan
- Facility Response Plan
- Air Permitting
- Water Discharge Permitting (NPDES/POTW)
- Stormwater Pollution Prevention Plan (SWPPP)
- Spill Response
- Hydrogen Sulfide Reporting
- Waste Disposal
- Provide Annual Training Opportunities
