OIL FIELD SERVICES FOR THE OIL & GAS INDUSTRY

Through years of first-hand experience in oil and gas exploration and production operations, Leggette, Brashears & Graham, Inc. (LBG) has gained a working knowledge of the business and the EH&S technical support associated with creating a successful operation for our clientele. Consequently, LBG is uniquely suited to provide oil field services related to these operations as follows:

- Obtaining water for fracturing operations
 - Evaluation of water resource availability
 - Modeling to determine if water pumping will adversely impact aquifer conditions
- Permitting and design for produced water disposal/injection via Class II injection wells
- Assist in National Pollutant Discharge Elimination System (NPDES) regulatory matters related to constructing cost effective and environmentally sound drilling locations and pads
- NPDES point source and storm water permitting and monitoring programs
- Secondary containment techniques and design for Spill Pollution Control and Countermeasure (SPCC) compliance
- Oil and produced water spill control and mitigation
- Landfarming
- Emergency response procedures
- Mock disaster training
